### BEST OF JO

Praise has been brewing for twelve-year-old filmmaker Logan Carlstrom's high-octane Lego film about a coffee-powered adventurer named Jo. See Jo ski, fish and climb; he's strong to the end cause he drinks his dark blend.

### KIDS WHO RIP

Watching these 6 to 12 year olds rip, shred, spin, soar, speed, and generally kick butt on their surfboards, skis, bmx bikes, skateboards, snowboards, and wakeboards, one wonders if these are some genetically enhanced super-kids, or as some would say in Taos, very "old souls." ### BODE MILLER: FLYING DOWNHILL

Bode Miller is the most successful US ski racer in the last 25 years, winning the overall World Cup title in 2005. While hailed in Europe as a rock star, his incredible athleticism, fearlessness and maverick style are less appreciated here at home. This richly personal documentary follows Bode from his humble roots in New Hampshire to his emergence as one of the most exciting skiers in the history of the sport. Full of rare slopeside footage and interviews with friends and family, this is an intimate portrait of the force of nature that is Bode. [www.flyingdownhill.com](http://www.flyingdownhill.com)

### DROWNING RIVER

When rising folk singer and starlet Katie Lee left Hollywood in 1954 and arrived in the untamed canyon lands of Arizona, her life changed forever. This film captures the spirit of Katie Lee and Glen Canyon as it tells the story of a drowned paradise and features interviews with Katie Lee and Chuck Bowden, David Brower's last footage of Glen Canyon and Edward Abbey's famous speech from the top of the Glen Canyon Dam.
